- Notes:**
1. With reference to anatomy and study of museum specimens, candidates must be well versed in the study of various systems with the help of charts/models/CD- ROMs, multimedia computer based simulations including computer assisted learning (CAL) and other softwares.
 2. With reference to permanent preparations and microscopic slides, in case of non-availability, the exercise should be substituted with diagrams, photographs, models, charts, etc.
 3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
 4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
 5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
 6. It should be ensured that animals used in the practical exercises are not covered under the wild life act 1972 and amendments made subsequently.
